PROFESSIONAL SUMMARY

Frontend AI Engineering Intern at FlyRank AI with hands-on experience building React/TypeScript interfaces and practical full-stack work across Java/Spring Boot REST APIs, Supabase/Firebase services, persistence, and SQL databases. I use AI-assisted engineering workflows for planning, implementation, debugging, review, and validation while keeping human decisions and quality checks explicit. Currently completing the Programming degree at Universidad Tecnológica Nacional (UTN) and targeting junior frontend or full-stack opportunities.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Vite, responsive design, reusable UI, state management

Backend & data: Python, Java, Spring Boot, REST APIs, JPA/Hibernate, DTOs, MySQL, PostgreSQL, Supabase, Firebase, Node.js

AI-assisted engineering: prompt/context documentation, task planning, output validation, code review, debugging, human correction; Claude, ChatGPT, Gemini, Cursor, Codex

Testing & tools: ESLint, automated tests, build validation, Git/GitHub, Conventional Commits, Swagger/OpenAPI, JUnit, Mockito, MockMvc

PROFESSIONAL EXPERIENCE

FlyRank AI | Frontend AI Engineering Intern | Jun 2026 - Present | Remote, Argentina

- Develop Lynkroam, a visual travel research workspace, using Next.js, React, TypeScript and Tailwind CSS to build reusable frontend architecture and source-aware research flows.
- Use Claude, ChatGPT, Gemini, Cursor and Codex for planning, implementation, debugging and iteration while documenting context, outputs and human corrections for traceable AI-assisted work.
- Apply Git/GitHub, project-specific AI instructions, Conventional Commits, and lint/test/build checks to validate changes before acceptance.

SELECTED PROJECTS

Lynkroam | Frontend AI Engineering Project | In Progress

- Building a Next.js/React/TypeScript/Tailwind visual research workspace with reusable architecture, responsive UI and clearly separated implemented vs. planned functionality.

Skillentis | Creator & Developer | Jan 2026 - Present

- Built and launched a React, TypeScript and Supabase SaaS; implemented GitHub data integration, authentication, bilingual responsive UI, SEO/structured data and production deployment.

Vireon Fit | Creator & Frontend Developer | Jan 2026 - Present

- Built an AI-assisted training app with React, TypeScript, Vite and Tailwind CSS; integrated Supabase for authentication, database persistence and backend services, and created a weekly adjustment engine for workout progression.

Food Store | Academic Full-Stack Project | 2026

- Built an individual TypeScript frontend and Java/Spring Boot REST API with JPA/Hibernate and MySQL for customer/admin workflows; implemented DTOs, validation, exception handling, Swagger/OpenAPI and 46+ unit/integration tests.

EDUCATION & CERTIFICATIONS

Universidad Tecnológica Nacional (UTN): Tecnicatura Universitaria en Programación, Feb 2025 - 2027 (in progress)

Teclab Instituto Técnico Superior: Técnico Superior en Programación, 2022 - Jun 2025 (completed)

freeCodeCamp: Machine Learning with Python; Legacy JavaScript Algorithms and Data Structures V8; Legacy Responsive Web Design V8

LANGUAGES & ADDITIONAL INFORMATION

Languages: Spanish (native); English (intermediate / upper-intermediate, technical reading and documentation) | **Work eligibility:** Polish citizenship and EU passport; eligible to work in the European Union
